

## Piper Navajo

Twin engine

Seating: 1+7

Cruise speed: 180 knots (330 km/h)

Range: 1330 km (max fuel) - 660 km (max passengers)

### Safe, Comfortable, Reliable, Secure

The Piper Navajo is an excellent corporate commuter aircraft. This versatile, twin-engined aircraft can easily accommodate a crew of 2 and up to 7 passengers, but is generally flown by a single pilot.

Perfect for scenic charters, the Navajo has rear luggage space and a window for every seat. While capable of flying at low levels to take in the views, the Navajo also has full instrumentation for flying at night or in reduced visibility.

Day or night, short or long trips, the Piper Navajo has the ability to get where you need to go in surprisingly short time. Think of the time and money you save by flying directly to and from a conveniently located airfield, without any luggage or check-in hassles.

Work smarter, charter your own aircraft.
